

# Nginx 安装文档

安装包 [示例: nginx-1.16.1.tar.gz]

下载地址 <http://nginx.org/en/download.html>

配置

```
./configure --prefix=/usr/local/nginx
```

编译

```
make
```

安装

```
make install
```

检查配置

```
nginx -t
```

启动

```
nginx
```

重载配置

```
nginx -s reload
```

立刻停止

```
nginx -s stop
```

平滑停止

```
nginx -s quit
```

查看进程

```
ps -ef | grep nginx
```

## 报错

./configure: error: the HTTP rewrite module requires the PCRE library.  
You can either disable the module by using --without-http\_rewrite\_module option, or install the PCRE library into the system, or build the PCRE library statically from the source with nginx by using **--with-pcre=<path>** option.

## 解决

```
yum -y install pcre-devel
```

## 报错

./configure: error: the HTTP gzip module requires the  
zlib library.

You can either disable the module by using --without-http\_gzip\_module option, or install the zlib library into the system, or build the zlib library statically from the source with nginx by using **--with-zlib=<path>** option.

## 解决

```
yum install -y zlib-devel
```
